The Cane Mutiny

Cane toads are obnoxious beasts,
They massacre goannas.
They live in Northern Queensland and
They lurk among bernannas.

They’re slowly marching from the north
Towards the far horizon;
Their hearts are full of evil and
Their skin is full of pizon.

Attempts to stop this loathesome plague
Are surely doomed to failure;
They’ll chomp and kill throughout the land
And toadally wreck Austrailure.

Ann Coleridge
